

SURIYA CHAUBEY

AI/ML Engineer · Data Engineer · Data Analyst

+66 82 532 4267 · suriyachaubey@gmail.com · github.com/TopOfficial · linkedin.com/in/suriya-chaubey · Bangkok, Thailand

SUMMARY

AI/ML and Data Engineer with production experience across LLM systems, RAG pipelines, and data engineering. Award-winning intern at Infineon Technologies (IFTH BE Symposium 2025). Targeting AI Engineer, Data Engineer, and Data Analyst roles.

EDUCATION

B.Eng. Software Engineering (Data & AI Track)

King Mongkut's Institute of Technology Ladkrabang (KMITL) · Bangkok, Thailand · Mar 2026

WORK EXPERIENCE

AI R&D Intern — Wafer Test Team | Infineon Technologies | May – Jul 2025

- **Designed and deployed a full LLM + RAG pipeline** for automated wafer log analysis — ingestion, embedding, retrieval, and LLM-generated engineering recommendations — **won 1st place at IFTH BE Symposium 2025**.
- Built structured **data pipelines** to ingest and process unstructured semiconductor test logs into queryable vector stores, enabling engineers to query fault history in natural language.
- Validated AI outputs against real defect patterns with test engineers, iterating on retrieval precision and model accuracy.

Data Scientist Intern | IBotnoi Consulting Co., Ltd. | May – Jun 2023

- Built a **fraud detection model** using Logistic Regression + PCA on transactional data, improving classification accuracy via dimensionality reduction.
- Delivered end-to-end **data pipeline**: collection, cleaning, preprocessing, EDA, and root-cause analysis — surfaced key failure patterns for voice bot model improvement.

PROJECTS

Nexus Analytics · Python · Multi-Agent · Claude API · Streamlit · Data Analysis | 2026

- Built an **autonomous data analysis platform** powered by **9 specialized AI agents** (orchestrator dispatches specialists for data hunting, cleaning, EDA, visualization, and PDF report generation) with two modes: **Research** (auto data-hunt via World Bank/IMF) and **Uploaded Data** (CSV/Excel); generates **Plotly charts**, EDA trend analysis, and downloadable **PDF reports**.

Markov Scanner · Python · yfinance · pandas · Flask · LINE API | 2026

- Built an **automated trading assistant scanning 566 tickers daily** (S&P 500, NASDAQ-100, SET50) using **Markov transition matrices** to rank buy candidates by composite quant score (**Net Edge + momentum + volume**), portfolio sell alerts, and a **LINE bot** for portfolio tracking via webhook commands (/add, /remove, /report).

Market Briefing Bot · Python · Claude API · yfinance · NewsAPI · LINE API | 2026

- Built a **daily automated market briefing** delivered at 10 AM Bangkok time — aggregates live prices (US stocks, gold, DXY, BTC/ETH/SOL), fetches top financial news, then calls the **Claude API** to generate a structured macro/sector/crypto analysis pushed via **LINE Messaging API**.

CompeteWatch · Python · FastAPI · Claude API · React · SQLite · Web Scraping | 2026

- Built a **full-stack competitive intelligence platform** that scrapes competitor websites, GitHub repos, Hacker News, and Product Hunt on a schedule, then uses the **Claude API** to generate **AI-written change digests**; includes **JWT auth**, file uploads, and a stats dashboard.

SME AI Chatbot · Python · LLMs · RAG · REST API | 2026

- Built a **production-ready RAG chatbot** for small businesses that answers domain-specific queries from a custom knowledge base; designed for deployment as a **freelance AI automation service**.

SmartAI Voice Assistant · Python · NLP · CFG/BNF Parsing · Speech Recognition | 2025

- Built a **voice-activated code execution system** using **NLP and CFG/BNF parsing** to support **dynamic code generation and execution** within a web application.

SKILLS

Data Engineering & Analysis: SQL/NoSQL, ETL Pipeline Design, Data Preprocessing, EDA, Feature Engineering, Power BI, Tableau Excel

AI / LLMs / NLP: LLM Fine-tuning, RAG, Prompt Engineering, NLP Pipelines, Text Classification, Embeddings

Machine Learning: Scikit-learn, Logistic Regression, PCA, CNN, Model Evaluation, Backtesting

Engineering: Python, Java, Javascript, REST APIs, Git, Docker, Node.js, React, TypeScript, R

Languages: Thai (Native), English (IELTS 7.0), Hindi (Conversational)
