

SURIYA CHAUBEY

AI/ML Engineer · Data Engineer · Data Analyst

+66 82 532 4267 · suriyachaubey@gmail.com · github.com/TopOfficial · linkedin.com/in/suriya-chaubey · Bangkok, Thailand

SUMMARY

AI/ML and Data Engineer with hands-on experience building LLM-based systems, NLP pipelines, RAG architectures, and end-to-end data pipelines in production environments. Strong background in data analysis, ETL design, and translating raw data into business insights. Proven track record in semiconductor AI R&D (award-winning at IFTH BE Symposium 2025) and fraud detection at scale. Seeking AI Engineer, Data Engineer, or Data Analyst roles where I can ship real-world, data-driven products.

EDUCATION

B.Eng. Software Engineering (Data & AI Track)

King Mongkut's Institute of Technology Ladkrabang (KMITL) · Bangkok, Thailand · Mar 2026

WORK EXPERIENCE

AI R&D Intern — Wafer Test Team | Infineon Technologies | May – Jul 2025

- Designed and deployed a full LLM + RAG pipeline for automated wafer log analysis — ingestion, embedding, retrieval, and LLM-generated engineering recommendations — **won 1st place at IFTH BE Symposium 2025**.
- Built structured **data pipelines** to ingest and process unstructured semiconductor test logs into queryable vector stores, enabling engineers to query fault history in natural language.
- Validated AI outputs against real defect patterns with test engineers, iterating on retrieval precision and model accuracy.

Data Scientist Intern | IBotnoi Consulting Co., Ltd. | May – Jun 2023

- Built a **fraud detection model** using Logistic Regression + PCA on transactional data, improving classification accuracy via dimensionality reduction.
- Delivered end-to-end **data pipeline**: collection, cleaning, preprocessing, EDA, and root-cause analysis — surfaced key failure patterns for voice bot model improvement.

PROJECTS

Stock Alert Bot · Python · EMA Ribbon · LINE API · Backtesting | 2025

- Built a swing-trading alert system using a **6-EMA ribbon strategy**. Sends real-time buy/sell signals via LINE Messaging API with a daily /report command.
- Backtested on AAPL 2y data: **39% win rate, 2.6 R/R ratio, +19.5% return**. Runs on automated cron schedule.
github.com/TopOfficial/stock-alert-bot

Wafer Log Sentiment Analysis System · Python · LLMs · RAG · Semiconductor Data | 2025

- End-to-end AI + data system that ingests semiconductor test logs, retrieves relevant fault history via RAG, and generates actionable engineering recommendations using LLMs — deployed during Infineon internship.

SME AI Chatbot · Python · LLMs · RAG · REST API | 2025

- Built a production-ready AI chatbot for small businesses, integrating a knowledge base via RAG to answer domain-specific queries. Designed for deployment on Fiverr/Upwork as a freelance AI automation service.

SmartAI Voice Assistant · Python · NLP · CFG/BNF Parsing · Speech Recognition | 2025

- Voice-activated Python code execution system using NLP and compiler design principles. Supports dynamic code generation and execution within a web application.

Fingerprint Verification System · Python · CNN · Image Processing | 2023

- CNN-based fingerprint verification with image preprocessing pipeline (histogram equalization, noise reduction, ridge enhancement) for accurate individual identification.

SKILLS

Data Engineering & Analysis: SQL/NoSQL, ETL Pipeline Design, Data Preprocessing, EDA, Feature Engineering, Power BI, Excel

AI / LLMs / NLP: LLM Fine-tuning, RAG, Prompt Engineering, NLP Pipelines, Text Classification, Embeddings

Machine Learning: Scikit-learn, Logistic Regression, PCA, CNN, Model Evaluation, Backtesting

Engineering: Python, REST APIs, Git, Docker, Node.js, React, TypeScript

Languages: Thai (Native), English (IELTS 7.0), Hindi (Conversational)
